Location: Miami, FL

Summary

Dedicated IT professional with over 15 years of experience in Site Reliability Engineering (SRE) and DevOps practices. Proven ability to lead teams, enhance system reliability, and implement efficient processes to drive operational excellence.

Skills

- **SRE/DevOps Skills:**
 - Infrastructure as Code (IaC) using Terraform and CloudFormation
 - Continuous Integration/Continuous Deployment (CI/CD) with Jenkins, GitLab CI, and CircleCI
 - Monitoring and logging with Prometheus, Grafana, and ELK Stack
 - Containerization and orchestration using Docker and Kubernetes
 - Cloud platforms: AWS, GCP, Azure
 - Configuration management with Ansible and Puppet
 - Incident management and response
 - Performance tuning and optimization
 - Scripting languages: Python, Bash
-

Professional Experience

Amadeus, Miami

SRE Lead

01/2009 - Present

- Led the SRE team, improving system uptime by 30% through proactive monitoring and incident management, ensuring high availability of critical services.
- Developed and maintained CI/CD pipelines, reducing deployment times by 50% and enhancing release quality through automated testing and deployment strategies.
- Collaborated with development teams to implement best practices for reliability and performance, resulting in a 25% decrease in incident response times.
- Conducted root cause analysis for incidents, implementing preventive measures to avoid recurrence and improve system resilience.
- Designed and implemented monitoring solutions using Prometheus and Grafana, providing real-time insights into system performance and health.
- Championed the adoption of Infrastructure as Code (IaC) practices, leading to more consistent and repeatable infrastructure deployments.

- Mentored junior engineers in SRE principles and practices, fostering a culture of continuous learning and improvement within the team.
- Engaged in capacity planning and performance tuning, ensuring systems are optimized for current and future workloads.

World Fuel, Miami, FL

DevOps Engineer

08/2007 - 01/2009

- Automated deployment processes, leading to a 40% reduction in release times and improved system reliability through streamlined workflows.
- Worked with cross-functional teams to ensure seamless integration of new features and enhancements, facilitating better collaboration between development and operations.
- Implemented monitoring and alerting systems to proactively identify and resolve issues before they impact users, improving overall service quality.
- Developed and maintained documentation for processes and systems, ensuring knowledge transfer and continuity within the team.
- Participated in on-call rotations, providing support for production systems and ensuring quick resolution of incidents.
- Conducted performance reviews and provided feedback to team members, promoting professional growth and accountability.
- Assisted in the migration of legacy systems to cloud-based solutions, improving scalability and reducing operational costs.
- Engaged in continuous improvement initiatives, identifying areas for process optimization and implementing solutions to enhance efficiency.

Cable & Wireless Jamaica

Systems Administrator

01/2005 - 08/2007

- Managed server infrastructure, ensuring high availability and performance across multiple platforms, including cloud and on-premises environments.
- Developed scripts for automation of routine tasks, enhancing operational efficiency and reducing manual errors, leading to a 20% increase in productivity.
- Provided technical support and training to staff on system usage and best practices, improving team capabilities and reducing support requests.
- Implemented security best practices, ensuring compliance with industry standards and protecting sensitive data.
- Conducted system audits and performance assessments, identifying areas for improvement and implementing necessary changes.
- Collaborated with network teams to ensure seamless integration of systems and services, enhancing overall infrastructure performance.
- Assisted in disaster recovery planning and execution, ensuring business continuity in the event of system failures.
- Engaged in capacity planning and resource allocation, optimizing system performance and cost-effectiveness.

Education

Masters of Computer Science

XYZ University, Location
